

BELLAGIO LL LO

TIMELESS HYBRID SHOE FOR ALWAYS AND EVERYWHERE.

The BELLAGIO LL LO has a simple, casual look and is the ideal shoe not only for a classic walk in the woods but also for urban pursuits. The lacing system and pared-down design of the high-quality water-repellent leather upper are conceived for everyday use without sacrificing functionality. The leather lining ensures the best foot climate possible, while the innovative sole package guarantees optimal foot support and flexibility - for city and countryside outings alike.

1 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

2 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

3 A special frame design known as LOWA MONOWRAP® provides stability.

DYNAPU®

4 LOWA DynaPU® provides noticeable cushioning with every step.

COLOURS

Espresso/espresso
311450 4242

WEIGHT

930 g/Pair (UK 8)

SUITABLE FOR

Strolls

The BELLAGIO LL LO is the perfect companion for outdoor strolls.

Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The BELLAGIO LL LO is just right for walks with the dog.

Family excursions

The BELLAGIO LL LO is ideal for a family excursion. This is a joint undertaking that a family does either indoors or outdoors in nature.

City tours

The BELLAGIO LL LO is perfect for activities in the city.

SOLE

LOWA® HYBRID TRAC®

The self-cleaning sole LOWA® HYBRID TRAC® is perfect for everyday use when the weather turns windy and nasty. With the help of its profile design and special tip and heel construction, it demonstrates its true strengths during ascents and descents.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 40 %

Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 20 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

ca. 20 %

Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

ca. 20 %

EVA

The acronym "EVA" stands for "ethylene-vinyl acetate". It corresponds to an elastomeric polymer that is used to make plastic materials. The EVA material creates soft and flexible qualities. It is primarily used in the production of shoe and shoe midsoles to provide step cushioning. Various degrees of rigidity can be achieved on the basis of the thickness employed.

LINING MATERIAL

The leather inner-lining creates cosy wearing comfort and a pleasant shoe climate.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 80 % Nubuck leather

Nubuck leather is a full-grain leather that is slightly sanded, a process that lends a velvety look to the leather. Nubuck leather is especially durable, robust and open-pored. Depending on the desired look, the suede can be left untreated during the manufacturing process or oiled or waxed.

ca. 20 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
