

## RAIK GTX

### CHILD-FRIENDLY MULTI-TALENT.

With the RAIK GTX, LOWA has fully tapped into the zeitgeist: The winter shoes that look like snowboard boots are up for every snowball fight or sled run. The upper made of nubuck and textile material fits in perfectly. The GORE-TEX Partelana lining creates the best-possible comfort.

**1** Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

**2** The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

**3** The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

**4** Lasts specially adapted to the anatomy of children's feet.

## COLOURS

Anthracite/petrol  
340115 9776

## WEIGHT

430 g/Pair (UK 8)

## SUITABLE FOR

### School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The RAIK GTX is just right for school life.

### Kindergarten

The RAIK GTX is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

### Playing

The RAIK GTX is the best playmate for the next adventure indoors or outdoors in nature.

## SOLE

### LOWA® SNEAKER KIDS WINTER

The simple sole model LOWA® SNEAKER KIDS WINTER obtains its light weight with the help of its diamond-shaped stud design in combination with its PU mixture. The result: romping around in the snow becomes lots more fun.

## MIDSOLE

### ca. 100 %

### Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

## INSOLE

**ca. 65 %**

### **Polyethylene**

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

**ca. 35 %**

### **Non-woven fabric**

Non-woven fabric is a collection of fibre of limited length, filaments or cut yarns. Used as a component/covering of feet beds, the layer of non-woven fabric absorbs the heat generated by the foot, creating a pleasant feeling of comfort even in cold weather.

## FUNCTIONS

A low, wrap-around frame on the midsole surrounds the foot.

The footwear has very soft rolling properties.

## UPPER MATERIAL

**ca. 60 %**

### **Suede leather**

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

**ca. 40 %**

### **Fabric**

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

## PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
