

INNOX EVO II GTX LIGHTWEIGHT MULTITALENT.

"Light and fast" is the motto of this multifunctional boot, whose many features make it the perfect choice for athletic outdoor activities. An upper of high-quality textile and microfibre material, paired with the high-performance GORE-TEX membrane ensures lightness and the best inner-shoe climate possible. As a result, the INNOX EVO II GTX is the perfect choice for your next casual hike or speed hiking tour.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

4 A special frame design known as LOWA MONOWRAP® provides stability.

DYNA**PU**®

5 LOWA DynaPU® provides noticeable cushioning with every step.

SUITABLE FOR

Nordic walking

Nordic walking is an endurance sport where participants' fast walking is supported by the use of two poles that follow the natural rhythm of the walkers' steps. The INNOX EVO II GTX is just right for Nordic walking.

Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The INNOX EVO II GTX is just right for walks with the dog.

Speed hiking

The INNOX EVO II GTX is perfect for speed hikes. The activity involves a rapid trek across challenging terrain using poles and light equipment.

Family excursions

The INNOX EVO II GTX is ideal for a family excursion. This is a joint undertaking that a family does either indoors or outdoors in nature.

Day hikes

The INNOX EVO II GTX is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

Strolls

The INNOX EVO II GTX is the perfect companion for outdoor strolls.

SOLE

LOWA® ENDURO EVO II

The multifunctional rubber sole of the LOWA® ENDURO EVO II features many striking, sharp-edged individual profile elements with straight folds, and provides a high level of grip, making it well-suited for many areas of application - from the everyday life to free time to simple hikes.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 83 % Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

ca. 17 % Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 50 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 50 % Microfibres

Microfibres are the result of a processing system for materials made of very fine fibres with a maximum thread size of 1 dtex. Microfibres are artificially produced from either petrochemical or renewable materials. The qualities of microfibres reflect those of the particular raw material used: They are particularly soft and stable. Microfibre fabric also dries especially fast, is comfortable to wear and has breathable qualities that enable sweat to escape from the material.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
