

LINO GTX

WELL-LINED FOR ADVENTURE-LOVING WINTERTIME KIDS.

Children have the most fun when they play together. LOWA's shoe designers have applied this knowledge to develop the highly functional LINO GTX. This trendy winter boot blends the best qualities of its two forerunner models to create a total multifunctional concept. This colourful, waterproof trendsetter equipped with a high upper is the perfect companion for adventures in damp, cold weather. It a quality that is created by the interplay among the shoe's toasty, wool-blend GORE-TEX Partelana lining, its robust fabric or microfibre material and its easy slip-on feature.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

4 A special frame design known as LOWA MONOWRAP® provides stability.

5 Lasts specially adapted to the anatomy of children's feet.

COLOURS

Graphite/orange
640530 9728

WEIGHT

480 g/Pair (UK 8)

SUITABLE FOR

Winter walks

Winter walks are relaxed outdoor strolls in winter weather. The LINO GTX is just right for such walks.

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The LINO GTX is just right for school life.

Kindergarten

The LINO GTX is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The LINO GTX is the best playmate for the next adventure indoors or outdoors in nature.

SOLE

LOWA® KIDS WINTER TRAC®

The LOWA® KIDS WINTER TRAC® comes with a sole design made of PU whose features include large studs and a special groove design in the front and heel areas. As a result, small winter fans are optimally equipped for romps in the snow.

MIDSOLE

ca. 100 % Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 65 % Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 35 % Non-woven fabric

Non-woven fabric is a collection of fibre of limited length, filaments or cut yarns. Used as a component/covering of feet beds, the layer of non-woven fabric absorbs the heat generated by the foot, creating a pleasant feeling of comfort even in cold weather.

FUNCTIONS

A zipper that permits footwear to be put on or taken off more quickly.

The footwear has very soft rolling properties.

UPPER MATERIAL

ca. 70 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 30 % Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
