

SIRKOS EVO GTX LO Ws

THE FANTASTIC VIEW DURING THE LAST TOUR

...
Versatile and light - the SIRKOS EVO GTX LO Ws stands out with a huge number of functional details. The high LOWA-Monowrap® sole construction provides the very best comfort. Together with the upper, it forms a solid unit. This feature makes the footwear well equipped for all kinds of outdoor adventures.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 Lasts specially adapted to the anatomy of women's feet.

4 The padded edging is softer and more flexible because of women's lower calf muscles.

SUITABLE FOR

Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The SIRKOS EVO GTX LO Ws is a good travel companion on such tours.

Day hikes

The SIRKOS EVO GTX LO Ws is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The SIRKOS EVO GTX LO Ws is just right for walks with the dog.

SOLE

LOWA® CROSS III

The name of the self-cleaning profile sole LOWA® CROSS III says it all: Its strengths really come into play on changing terrain and facilitate energy-saving walking and hiking with the help of their special profile design.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 70 %

Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 20 %

Felt

Felt is a textile fabric that is made of disordered fibrous material that is difficult to separate. The textile fabric is characterised by its high elasticity and its insulating qualities. As a result, it is used in particular as a component in insoles and as an insulating divider.

ca. 10 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

FUNCTIONS

SINGLE
INJECTION

The single-injection midsole is directly injected onto the footwear.

STABILITY
FRAME

A special frame design known as LOWA MONOWRAP® provides an extra degree of stability.

FLEXIBLE

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 80 %

Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

ca. 20 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
