

BADIA GTX Ws

IF YOU GO LOOKING FOR ME, YOU'LL FIND ME EXPLORING THE WORLD ...

If you are looking for a reliable companion for your next trekking tour, someone who can go the distance, then you should take a closer look at the BADIA GTX Ws. LOWA designed this mountaineering boot with the anatomy of women's feet in mind and enhanced it with an array of details: They include a GORE-TEX membrane for miserable weather conditions, a two-zone lacing system and high-quality ROLLER EYELETS for easy tying. The VIBRAM TRAC LITE II sole performs well on the widest range of surfaces.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 Proven Vibram rubber sole from a high-quality provider from Italy.

3 The forefoot and upper area can be laced in varying degrees of tightness.

4 Holds the tongue in place with the help of the laces and prevents slippage in the process.

5 Lasts specially adapted to the anatomy of women's feet.

COLOURS

Turquoise/mandarin
220612 6915

WEIGHT

1170 g/Pair (UK 8)

SUITABLE FOR

Mountain hiking

The BADIA GTX Ws is ideal for mountain hiking. This involves a tour in mountainous terrain.

Multi-day hikes

A multi-day hike involves a tour with a backpack that lasts for more than 24 hours. The BADIA GTX Ws is the perfect footwear for such hikes.

Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The BADIA GTX Ws is a good travel companion on such tours.

Long-distance hiking

The BADIA GTX Ws is perfect for long-distance hiking. It involves covering a great distance on foot over a period of several days.

Day hikes

The BADIA GTX Ws is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

SOLE

VIBRAM TRAC® LITE II

The VIBRAM TRAC® LITE II has a multifunctional profile that includes a rubber compound and special sole design in the front and heel area. With the help of these features, it can take on the widest range of activities.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 40 % Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

ca. 10 % Mesh

Mesh is a material that consists of many evenly spaced holes. It is usually made of polyester or nylon and basically a lattice-like material that is created by interwoven threads. Thanks to its special design, the man-made fibre is particularly permeable to air, has special moisture-regulating qualities and is easy to care for, breathable and crease-resistant.

ca. 50 % Viscoelastic latex foam

Viscoelastic latex foam is made of a remarkable polymer that lends a special form memory to the foam. Once body heat or pressure is applied to the viscoelastic foam, the foam adapts exactly to these particular contours. This feature equally distributes pressure and eases stress on the feet.

FUNCTIONS

Roller eyelets make for easy lacing.

The shoe is moderately stiff.

UPPER MATERIAL

ca. 70 % Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

ca. 30 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
