

ZIRROX GTX MID JUNIOR

CHILDREN'S SHOES CAN BE SO GROWN UP.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

DYNAPU®

3 LOWA DynaPU® provides noticeable cushioning with every step.

4 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

5 A special frame design known as LOWA MONOWRAP® provides stability.

6 Lasts specially adapted to the anatomy of children's feet.

If parents can wear sporty multifunctional shoes, their frisky children should also be able to enjoy some dynamic shoes of their own. This means that the ZIRROX GTX MID JUNIOR measures up to its grown-up counterparts in every possible way. Their light weight, their practical fast lacing system and their robust fabric material with a waterproof GORE-TEX membrane create non-stop wearing comfort for children.

SUITABLE FOR

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The ZIRROX GTX MID JUNIOR is just right for school life.

Kindergarten

The ZIRROX GTX MID JUNIOR is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The ZIRROX GTX MID JUNIOR is the best playmate for the next adventure indoors or outdoors in nature.

SOLE

LOWA® MULTI TRAC® KIDS

The performance sole LOWA® MULTI TRAC® Kids was designed for multifunctional outdoor uses by small adventurers. The triangular stud delivers peak performance uphill and downhill on all sorts of surfaces. The flexible, abrasion-resistant outsole impresses with its pleasant rolling properties and durability – even when used extensively on asphalt.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 75 %

Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 20 %

Felt

Felt is a textile fabric that is made of disordered fibrous material that is difficult to separate. The textile fabric is characterised by its high elasticity and its insulating qualities. As a result, it is used in particular as a component in insoles and as an insulating divider.

ca. 5 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

FUNCTIONS

The footwear has very soft rolling properties.

UPPER MATERIAL

ca. 70 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 30 %

Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
