

RENEGADE LL LO

25 YEARS OF RENEGADE.

The RENEGADE is the cult model among multifunctional shoes, and the LOW-CUT version of this proven footwear classic lives up to this reputation. The proof of this can be seen in the shoe's grippy sole, its robust nubuck leather and its soft leather lining, a feature that creates optimal fit. And the further optimised cushioning also turns this marvel of excellent fit into a perfect companion for everyday activities or hikes on undemanding terrain.

1 Proven Vibram rubber sole from a high-quality provider from Italy.

2 A special frame design known as LOWA MONOWRAP® provides stability.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

DYNA**PU**®

4 LOWA DynaPU® provides noticeable cushioning with every step.

COLOURS

Black
310958 0999

WEIGHT

960 g/Pair (UK 8)

SUITABLE FOR

Strolls

The RENEGADE LL LO is the perfect companion for outdoor strolls.

SOLE

VIBRAM EVO TRAC®

The multifunctional profile design and the proven rubber compound of the self-cleaning sole VIBRAM EVO TRAC® deliver optimal performance. The special design of the sole's tip and heel provide a high degree of comfort during ascents and descents.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 10 %

Microfibre

Microfibres are the result of a processing system for materials made of very fine fibres with a maximum thread size of 1 dtex.

Microfibres are artificially produced from either petrochemical or renewable materials. The qualities of microfibres reflect those of the particular raw material used: They are particularly soft and stable. Microfibre fabric also dries especially fast, is comfortable to wear and has breathable qualities that enable sweat to escape from the material.

ca. 90 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

LINING MATERIAL

The leather inner-lining creates cosy wearing comfort and a pleasant shoe climate.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 90 % Nubuck leather

Nubuck leather is a full-grain leather that is slightly sanded, a process that lends a velvety look to the leather. Nubuck leather is especially durable, robust and open-pored. Depending on the desired look, the suede can be left untreated during the manufacturing process or oiled or waxed.

ca. 10 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
