

FERROX GTX MID JR

TWIST AND RUN.

Wow, incredible! Who would have thought that the new FERROX GTX MID JR would be just as easy to put on and take off as its low-cut counterpart? The children's shoe, which extends above the ankle, also features the practical BOA® Fit system. A multifunctional concept that will make kids' hearts leap for joy, and not just because of the cool digital graphics: the child-friendly last, the cushioning LOWA® DYNAPU® midsole and the supportive SUPPORT FRAME also leave nothing to be desired.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best possible comfort.

3 The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

DYNAPU®

4 LOWA DynaPU® provides noticeable cushioning with every step.

5 Lasts specially adapted to the anatomy of children's feet.

SUITABLE FOR

Family excursions

The FERROX GTX MID JR is ideal for a family excursion. This is a joint undertaking that a family does either indoors or outdoors in nature.

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The FERROX GTX MID JR is just right for school life.

Kindergarten

The FERROX GTX MID JR is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The FERROX GTX MID JR is the best playmate for the next adventure indoors or outdoors in nature.

SOLE

LOWA® URBAN TRAIL JUNIOR

The LOWA® URBAN TRAIL JUNIOR is guaranteed to provide the best comfort in the city or on light terrain thanks to a profile design that has been optimised for this very purpose. The profile channels are designed in such a way that they can optimally repulse moisture and dirt. The updated profile design provides harmonious rolling properties.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 70 % Memolatex

Memo latex is composed of very soft latex foam. In addition to being lightweight, memo latex supports the natural rolling motion of the foot. It is primarily used in shoe insoles as a result. Memo latex also individually enwraps the foot and is particularly comfortable as a result.

ca. 30 % Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

FUNCTIONS

A low, wrap-around frame on the midsole surrounds the foot.

The footwear has very soft rolling properties.

UPPER MATERIAL

ca. 50 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 50 % Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
