

KODY EVO GTX MID JUNIOR

MADE FOR CHILDREN, LOVED BY CHILDREN.

The ultimate measure of the quality of a child's shoe is the frequency that it is worn. One thing is certain: The KODY EVO GTX MID JUNIOR will certainly be able to hang tough much longer than your children will. The mid-cut footwear does not just fit great and look pretty cool. The multifunctional hiking shoe is also incredibly durable thanks to its upper made of tough split leather and Vibram sole - we promise.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 Proven Vibram rubber sole from a high-quality provider from Italy.

3 A special frame design known as LOWA MONOWRAP® provides stability.

4 Lasts specially adapted to the anatomy of children's feet.

SUITABLE FOR

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The KODY EVO GTX MID JUNIOR is just right for school life.

Kindergarten

The KODY EVO GTX MID JUNIOR is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The KODY EVO GTX MID JUNIOR is the best playmate for the next adventure indoors or outdoors in nature.

Day hikes

The KODY EVO GTX MID JUNIOR is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

SOLE

VIBRAM RENEVO II JUNIOR

The wide cut with the large contact area, the coarse, self-cleaning sole profile, the MONOWRAP® sole design and the grippy rubber outsole are the defining features of the outdoor sole VIBRAM RENEVO II JUNIOR.

MIDSOLE

ca. 100 % Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 45 % Memolatex

Memo latex is composed of very soft latex foam. In addition to being lightweight, memo latex supports the natural rolling motion of the foot. It is primarily used in shoe insoles as a result. Memo latex also individually enwraps the foot and is particularly comfortable as a result.

ca. 45 % Felt

Felt is a textile fabric that is made of disordered fibrous material that is difficult to separate. The textile fabric is characterised by its high elasticity and its insulating qualities. As a result, it is used in particular as a component in insoles and as an insulating divider.

ca. 10 % Mesh

Mesh is a material that consists of many evenly spaced holes. It is usually made of polyester or nylon and basically a lattice-like material that is created by interwoven threads. Thanks to its special design, the man-made fibre is particularly permeable to air, has special moisture-regulating qualities and is easy to care for, breathable and crease-resistant.

FUNCTIONS

The single-injection midsole is directly injected onto the footwear.

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 80 % Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

ca. 20 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
