

INNOX EVO GTX LO LIGHTWEIGHT MULTITALENT.

"Light and fast" is the motto of this multifunctional footwear, whose many features make it the perfect choice for outdoor athletic activities. An upper made of high-quality woven fabric and microfibre material, combined with a high-performance GORE-TEX membrane, creates a feeling of lightness and the best climate in the shoe. As a result, the INNOX EVO GTX LO is the perfect choice for your next casual hike or speed hiking tour.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

4 A special frame design known as LOWA MONOWRAP® provides stability.

DYNAPU®

5 LOWA DynaPU® provides noticeable cushioning with every step.

COLOURS

WEIGHT

700 g/Pair (UK 8)

SUITABLE FOR

Nordic walking

Nordic walking is an endurance sport where participants' fast walking is supported by the use of two poles that follow the natural rhythm of the walkers' steps. The INNOX EVO GTX LO is just right for Nordic walking.

Speed hiking

The INNOX EVO GTX LO is perfect for speed hikes. The activity involves a rapid trek across challenging terrain using poles and light equipment.

Strolls

The INNOX EVO GTX LO is the perfect companion for outdoor strolls.

City tours

The INNOX EVO GTX LO is perfect for activities in the city.

SOLE

LOWA® ENDURO EVO

The self-cleaning rubber sole LOWA® ENDURO EVO has been optimised for multifunctional uses and comes with a striking, sharp-edged profile design. This feature makes it perfect for a broad range of uses – during the daily routine, leisure time or easy hikes.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 5 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 95 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 50 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 50 % Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
