

TORO PRO GTX MID Ws

A MUTLITALENT FOR LIGHT TOURS.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

4 A special frame design known as LOWA MONOWRAP® provides stability.

DYNAPU®

5 LOWA DynaPU® provides noticeable cushioning with every step.

6 Lasts specially adapted to the anatomy of women's feet.

7 The padded edging is softer and more flexible because of women's lower calf muscles.

Unbelievably snug, athletically flexible and truly multifunctional, LOWA's new TORO PRO GTX MID Ws is the perfect companion for everyday adventures. After work or on weekends - these jack-of-all-trades outdoor shoes are so comfortable and snug that a brief stroll can spontaneously turn into a short hike. The GORE-TEX membrane ensures optimal weather protection and excellent breathability.

COLOURS

Petrol/mint
320769 7441

Navy/rose
320769 6909

WEIGHT

860 g/Pair (UK 8)

SUITABLE FOR

Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The TORO PRO GTX MID Ws is just right for walks with the dog.

Day hikes

The TORO PRO GTX MID Ws is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The TORO PRO GTX MID Ws is a good travel companion on such tours.

SOLE

LOWA® MULTI TRAC® II

The triangular profile design used in the sole LOWA® MULTI TRAC® II is ideal for multifunctional outdoor uses on moderate terrain. The sole provides pleasant rolling properties, helping to prevent fatigue from setting in.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 46 % Memolatex

Memo latex is composed of very soft latex foam. In addition to being lightweight, memo latex supports the natural rolling motion of the foot. It is primarily used in shoe insoles as a result. Memo latex also individually enwraps the foot and is particularly comfortable as a result.

ca. 43 % Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

ca. 11 % Mesh

Mesh is a material that consists of many evenly spaced holes. It is usually made of polyester or nylon and basically a lattice-like material that is created by interwoven threads. Thanks to its special design, the man-made fibre is particularly permeable to air, has special moisture-regulating qualities and is easy to care for, breathable and crease-resistant.

FUNCTIONS

The shoe is moderately stiff.

UPPER MATERIAL

ca. 80 % Nubuck leather

Nubuck leather is a full-grain leather that is slightly sanded, a process that lends a velvety look to the leather. Nubuck leather is especially durable, robust and open-pored. Depending on the desired look, the suede can be left untreated during the manufacturing process or oiled or waxed.

ca. 20 % Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
