

TAURUS PRO GTX MID Ws

CLASSIC LOOK WITH FUNCTIONAL DETAILS.

No matter whether you want to take long walks or hike on paved trails - the TAURUS PRO GTX MID Ws will always feel right at home. The light and discreet multifunctional boot is made on a last that is specially designed for women's feet. Thanks to its MID-CUT upper made of suede leather and its robust fabric, the boot offers good performance and perfect fit. Its waterproof GORE-TEX lining provides the very best comfort at all times.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 A special frame design known as LOWA MONOWRAP® provides stability.

4 Lasts specially adapted to the anatomy of women's feet.

WEIGHT

820 g/Pair (UK 8)

SUITABLE FOR

Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The TAURUS PRO GTX MID Ws is just right for walks with the dog.

Day hikes

The TAURUS PRO GTX MID Ws is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The TAURUS PRO GTX MID Ws is a good travel companion on such tours.

SOLE

LOWA® LIMA

The LOWA® LIMA sole impresses with its multidirectional profile alignment that provides a solid grip on moderate terrain. To ensure pleasant mountain climbs, the sole also has a distinctive heel edge.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 15 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 40 %

Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 45 %

Felt

Felt is a textile fabric that is made of disordered fibrous material that is difficult to separate. The textile fabric is characterised by its high elasticity and its insulating qualities. As a result, it is used in particular as a component in insoles and as an insulating divider.

FUNCTIONS

The single-injection midsole is directly injected onto the footwear.

The shoe is moderately stiff.

UPPER MATERIAL

ca. 60 %

Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

ca. 40 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
