

MERGER GTX MID HYBRID MULTITALENTS – PERFECTLY FRAMED.

Hybrid solutions are currently one of the hottest trends for achieving long-term mobility. This also applies to the new MERGER GTX MID, an extravagantly designed sporty multifunctional shoe that catapults you into motion from a standing start. Lightweight and flexible yet robust, the eye-catching ATS model cuts an extremely dynamic figure. Equipped with the innovative crossover STABILITY FRAME and a reinforced collar, the lightweight hybrid model is the ideal companion for high-paced hiking tours.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 The midsole has been specially adapted to the anatomy of the foot.

4 LOWA DynaPU® provides noticeable cushioning with every step.

SUITABLE FOR

Nordic walking

Nordic walking is an endurance sport where participants' fast walking is supported by the use of two poles that follow the natural rhythm of the walkers' steps. The MERGER GTX MID is just right for Nordic walking.

Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The MERGER GTX MID is just right for walks with the dog.

Speed hiking

The MERGER GTX MID is perfect for speed hikes. The activity involves a rapid trek across challenging terrain using poles and light equipment.

Family excursions

The MERGER GTX MID is ideal for a family excursion. This is a joint undertaking that a family does either indoors or outdoors in nature.

Day hikes

The MERGER GTX MID is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

Strolls

The MERGER GTX MID is the perfect companion for outdoor strolls.

SOLE

LOWA® GT

The rubber sole LOWA® GT is characterised by its angular profile design. This feature provides a large contact surface and solid grip on easy terrain or during urban outings.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 5 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 50 %

Memolatex

Memo latex is composed of very soft latex foam. In addition to being lightweight, memo latex supports the natural rolling motion of the foot. It is primarily used in shoe insoles as a result. Memo latex also individually enwraps the foot and is particularly comfortable as a result.

ca. 45 %

Felt

Felt is a textile fabric that is made of disordered fibrous material that is difficult to separate. The textile fabric is characterised by its high elasticity and its insulating qualities. As a result, it is used in particular as a component in insoles and as an insulating divider.

FUNCTIONS

MINIMAL SEAMS

Avoidance of unnecessary stitches to reduce pressure points.

SINGLE INJECTION

The single-injection midsole is directly injected onto the footwear.

STABILITY FRAME

A special frame design known as LOWA MONOWRAP® provides an extra degree of stability.

FLEXIBLE

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 50 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 50 %

Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
