

# CAMINO EVO GTX

## READY TO VENTURE OFF THE BEATEN TRACK.

**1** Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

**2** Proven Vibram rubber sole from a high-quality provider from Italy.

**3** The forefoot and upper area can be laced in varying degrees of tightness.

**4** Holds the tongue in place with the help of the laces and prevents slippage in the process.

**5** Increased flexibility of the upper for pleasant walking.

**6** Special tongue construction with asymmetric padding for even pressure distribution.

When you are racking up one kilometre after another in a comfortable pair of trekking boots, you certainly won't mind taking a detour that you encounter along the way. This is particularly the case with the CAMINO EVO GTX. It impresses users with a wide range of functions. These include a moderately stiff midsole, a feature that has been optimised both functionally and optically. With the help of a softer insert in the heel and forefoot areas, the bi-density sole creates an extra layer of cushioning whilst the rest of the sole provides the stability that wearers need thanks to the use of a harder insert. The combination of heel-to-toe drop and the FLEXFIT® system on the ankle facilitates ergonomic rolling.

## SUITABLE FOR

### Mountain hiking

The CAMINO EVO GTX is ideal for mountain hiking. This involves a tour in mountainous terrain.

### Multi-day hikes

A multi-day hike involves a tour with a backpack that lasts for more than 24 hours. The CAMINO EVO GTX is the perfect footwear for such hikes.

### Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The CAMINO EVO GTX is a good travel companion on such tours.

### Long-distance hiking

The CAMINO EVO GTX is perfect for long-distance hiking. It involves covering a great distance on foot over a period of several days.

### Approaches

The approach boot CAMINO EVO GTX is perfect for the hike to the starting point of the actual via ferrata or climbing tour.

### Day hikes

The CAMINO EVO GTX is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

## SOLE

### VIBRAM APPTRAIL II

The VIBRAM APPTRAIL II sole has a modern, self-cleaning profile. It proves its exceptional capabilities particularly when it is put to the test on challenging terrain. The sole's features are complemented on every terrain by the distinctive heel front that excels during descents.

## MIDSOLE

### ca. 100 %

#### Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

## INSOLE

### ca. 40 %

#### Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

### ca. 50 %

#### Viscoelastic latex foam

Viscoelastic latex foam is made of a remarkable polymer that lends a special form memory to the foam. Once body heat or pressure is applied to the viscoelastic foam, the foam adapts exactly to these particular contours. This feature equally distributes pressure and eases stress on the feet.

### ca. 10 %

#### Mesh

Mesh is a material that consists of many evenly spaced holes. It is usually made of polyester or nylon and basically a lattice-like material that is created by interwoven threads. Thanks to its special design, the man-made fibre is particularly permeable to air, has special moisture-regulating qualities and is easy to care for, breathable and crease-resistant.

## FUNCTIONS

ROLLER EYELETS

Roller eyelets make for easy lacing.

LOWA FLEX®

Upper design with freely moving lace hooks and lacing systems.

MODERATELY STIFF

The shoe is moderately stiff.

## UPPER MATERIAL

ca. 100 %

### Nubuck leather

Nubuck leather is a full-grain leather that is slightly sanded, a process that lends a velvety look to the leather. Nubuck leather is especially durable, robust and open-pored. Depending on the desired look, the suede can be left untreated during the manufacturing process or oiled or waxed.
