

## CAREZZA GTX LO Ws

### MULTIPLE FEATURES UNITED IN ONE SHOE

What is the perfect balance between a flexible, multifunctional shoe and a robust trail runner? The answer: The new CAREZZA GTX LO Ws is a dynamic low-cut model that does not merely look athletic. The midsole made of cushioning LOWA DynaPU®+ and the deep-tread Vibram outsole deliver dynamic performance on almost any terrain. However, the real highlights are the specially woven Jacquard fabric material and the waterproof, breathable GORE-TEX membrane that ensures a constantly pleasant foot climate and perfect wearing comfort.

**1** Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

**2** Proven Vibram rubber sole from a high-quality provider from Italy.

**3** Lasts specially adapted to the anatomy of women's feet.

**4** The padded edging is softer and more flexible because of women's lower calf muscles.

## SUITABLE FOR

### Approaches

The approach boot CAREZZA GTX LO Ws is perfect for the hike to the starting point of the actual via ferrata or climbing tour.

### Mountain hiking

The CAREZZA GTX LO Ws is ideal for mountain hiking. This involves a tour in mountainous terrain.

### Multi-day hikes

A multi-day hike involves a tour with a backpack that lasts for more than 24 hours. The CAREZZA GTX LO Ws is the perfect footwear for such hikes.

### Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The CAREZZA GTX LO Ws is a good travel companion on such tours.

### Long-distance hiking

The CAREZZA GTX LO Ws is perfect for long-distance hiking. It involves covering a great distance on foot over a period of several days.

### Day hikes

The CAREZZA GTX LO Ws is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

## SOLE

### VIBRAM ROCK TRAC® SENSE

The VIBRAM ROCK TRAC® SENSE shows off its strengths on versatile terrain: Good grip, the Vibram XS Trek rubber compound and the special triangular profile design provide optimal comfort.

---

## MIDSOLE

### ca. 100 % Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

---

## INSOLE

### ca. 90 % Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

### ca. 10 % Mesh

Mesh is a material that consists of many evenly spaced holes. It is usually made of polyester or nylon and basically a lattice-like material that is created by interwoven threads. Thanks to its special design, the man-made fibre is particularly permeable to air, has special moisture-regulating qualities and is easy to care for, breathable and crease-resistant.

## FUNCTIONS

DYNA**PU**®

LOWA DynaPU®+ has a very high level of recovery behaviour. The highly elastic features maintain their properties for a very long period of time.

The footwear is flexible and supports natural rolling properties as a result.

## UPPER MATERIAL

### ca. 15 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

### ca. 85 % Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

## PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
