

## AXOS GTX MID Ws

### PROGRESSIVE AND SPORTY.

Fashionably elegant, but athletically functional, the AXOS GTX MID Ws represents a completely new concept in trendy multifunctional shoes. Unlike comparable models, the casual leisure-time multitasker is the perfect choice for every occasion. The lightweight and tremendously snug MID-CUT shoes definitely love the sporting life. This is demonstrated not only by their progressive look, but also in particular by the footwear's many functional details, including its waterproof GORE-TEX lining, a midsole made of LOWA DynaPU® and an upper design that eliminates certain seams.

**1** Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

**2** An outsole designed by LOWA with an optimised rubber compound to provide good grip.

**3** The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

**DYNAPU®**

**4** LOWA DynaPU® provides noticeable cushioning with every step.

**5** Lasts specially adapted to the anatomy of women's feet.

## COLOURS

Icegrey/vanilla  
320844 9257

## WEIGHT

800 g/Pair (UK 8)

## SUITABLE FOR

### Day hikes

The AXOS GTX MID Ws is perfect for day hikes. These outings last for less than 24 hours and lead back to the starting point.

### Strolls

The AXOS GTX MID Ws is the perfect companion for outdoor strolls.

### Walks with the dog

Walking the dog is a joint activity in which dog owners and their pets head out into nature. The AXOS GTX MID Ws is just right for walks with the dog.

### Family excursions

The AXOS GTX MID Ws is ideal for a family excursion. This is a joint undertaking that a family does either indoors or outdoors in nature.

## SOLE

### LOWA® CAMARA Ws

The rubber sole LOWA® CAMARA Ws comes with a large profile design that offers a bigger contact surface. This feature delivers solid grip on easy terrain or during urban outings.

## MIDSOLE

### ca. 100 %

#### Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

## INSOLE

### ca. 90 %

#### Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

### ca. 10 %

#### Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

## FUNCTIONS

Avoidance of unnecessary stitches to reduce pressure points.

A low, wrap-around frame on the midsole surrounds the foot.

The footwear is flexible and supports natural rolling properties as a result.

## UPPER MATERIAL

### ca. 30 %

#### Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

### ca. 70 %

#### Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

## PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
