

DELAGO GTX LO JUNIOR SL OPTIMAL LOW-CUT SHOE FOR OUTDOOR MIDGETS.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

4 A special frame design known as LOWA MONOWRAP® provides stability.

DYNAPU®

5 LOWA DynaPU® provides noticeable cushioning with every step.

6 Lasts specially adapted to the anatomy of children's feet.

Having been designed with the specific needs of children's feet in mind, the multifunctional low-cut boot offers the perfect combination of flexibility and stability. This was one of the main goals of Dr Micha Bahr, a specialist in children's surgery and manual medicine, who helped LOWA to develop the shoe. The DELAGO GTX LO JUNIOR SL is optimally equipped for the next adventure in nature. The GORE-TEX membrane keeps children's feet continuously dry, and the midsole made of LOWA DynaPU® ensures optimal roll-off motion.

SUITABLE FOR

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The DELAGO GTX LO JUNIOR SL is just right for school life.

Kindergarten

The DELAGO GTX LO JUNIOR SL is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The DELAGO GTX LO JUNIOR SL is the best playmate for the next adventure indoors or outdoors in nature.

SOLE

LOWA® MULTI TRAC® KIDS

The performance sole LOWA® MULTI TRAC® Kids was designed for multifunctional outdoor uses by small adventurers. The triangular stud delivers peak performance uphill and downhill on all sorts of surfaces. The flexible, abrasion-resistant outsole impresses with its pleasant rolling properties and durability – even when used extensively on asphalt.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 70 %

Memolatex

Memo latex is composed of very soft latex foam. In addition to being lightweight, memo latex supports the natural rolling motion of the foot. It is primarily used in shoe insoles as a result. Memo latex also individually enwraps the foot and is particularly comfortable as a result.

ca. 30 %

Polyester

Polyester is synthetic plastic fibre made from crude oil. In chemical terms, it is a polymer that can be processed into many different materials. Thanks to its chemical flexibility, polyester is lightweight, dries quickly, does not shrink and has the highest levels of tear and abrasion resistance.

FUNCTIONS

The footwear has very soft rolling properties.

UPPER MATERIAL

ca. 80 %

Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

ca. 20 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
