

LOWA® EXPLORER II GTX MID **THE NEXT GENERATION OF FUNCTIONAL HIKING BOOTS.**

Trekking lovers and hikers listen up: The time is always right for an outdoor adventure. It becomes even better when it's done in and with the right footwear. The LOWA® EXPLORER II GTX MID is made to order for such occasions. This chic, stylishly embossed boot made of high-quality full-grain leather will allow you to walk away boredom step by step. Endurance is provided by the cushioning midsole made of LOWA DynaPU®, the VIBRAM outsole and, of course, the GORE-TEX membrane that keeps out wind and weather.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 Proven Vibram rubber sole from a high-quality provider from Italy.

COLOURS

Atlantic/kiwi
210760 6325

WEIGHT

1160 g/Pair (UK 8)

SUITABLE FOR

Mountain hiking

The LOWA® EXPLORER II GTX MID is ideal for mountain hiking. This involves a tour in mountainous terrain.

Pilgrim hiking

A pilgrim hike is a long-distance journey by foot that is motivated by spiritual needs. The LOWA® EXPLORER II GTX MID is a good travel companion on such tours.

SOLE

VIBRAM ROCK TRAC® EVO

The VIBRAM ROCK TRAC® EVO shows off its strengths on versatile terrains: Good grip, the XS Trek rubber compound and the special triangular profile design provide optimal comfort.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 90 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.

Through the use of PU, the soles become lightweight and functionally flexible.

ca. 10 %

Mesh

Mesh is a material that consists of many evenly spaced holes. It is usually made of polyester or nylon and basically a lattice-like material that is created by interwoven threads. Thanks to its special design, the man-made fibre is particularly permeable to air, has special moisture-regulating qualities and is easy to care for, breathable and crease-resistant.

FUNCTIONS

DYNA**PU**®

LOWA DynaPU®+ has a very high level of recovery behaviour. The highly elastic features maintain their properties for a very long period of time.

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

ca. 80 %

Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

ca. 20 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
