

MILO GTX HI

IT'S THE BEST FORM OF EQUIPMENT FOR THE NEXT SLEDDING ADVENTURE.

Fast in, fast out! Many kids live by this motto during the cold time of year when they think about putting on and taking off their winter shoes. The high-cut MILO GTX HI with its three solid fasteners is just what they need.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

3 A special frame design known as LOWA MONOWRAP® provides stability.

4 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

5 Lasts specially adapted to the anatomy of children's feet.

COLOURS

Navy/berry
640540 6951

WEIGHT

540 g/Pair (UK 8)

SUITABLE FOR

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The MILO GTX HI is just right for school life.

Kindergarten

The MILO GTX HI is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The MILO GTX HI is the best playmate for the next adventure indoors or outdoors in nature.

SOLE

LOWA® AL-K III

The robust PU children's shoe sole LOWA® AL-K III distinguishes itself with its outdoor-oriented profile design and a LOWA MONOWRAP® sole design, features that make it a lot of fun to wear on asphalt or terrain away from the street.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 65 % Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 35 % Non-woven fabric

Non-woven fabric is a collection of fibre of limited length, filaments or cut yarns. Used as a component/covering of feet beds, the layer of non-woven fabric absorbs the heat generated by the foot, creating a pleasant feeling of comfort even in cold weather.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

UPPER MATERIAL

**ca. 70 %
Fabric**
Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

**ca. 30 %
Synthetic**
Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
