

FORTUX Ws **EAT UP THE MILES**

Especially during an ultra-trail marathon, every little bit of comfort counts, and the FORTUX Ws has plenty of it to offer. Thanks to its excellent cushioning, the additional padding on the upper and the high level of comfort, this trail runner is truly predestined for the long haul. When the last few kilometres to the finishing line remain to be conquered, ambitious ultra runners can rely completely and utterly on the new FORTUX Ws shoe.

1 Lasts specially adapted to the anatomy of women's feet.

WEIGHT

530 g/Pair (UK 8)

SUITABLE FOR

Trailrunning

The new FORTUX Ws is designed in particular to excel on demanding terrain and deliver exceptional performance, the result of his remarkable grip, protection and stability.

SOLE

LOWA® TRAC® ULTRA

The bi-directional lugs provide both targeted acceleration (forefoot) and grippy braking (heel). The construction provides the necessary stability for long-distance runs.

MIDSOLE

ca. 100 % EVA

The acronym "EVA" stands for "ethylene-vinyl acetate". It corresponds to an elastomeric polymer that is used to make plastic materials. The EVA material creates soft and flexible qualities. It is primarily used in the production of shoe and shoe midsoles to provide step cushioning. Various degrees of rigidity can be achieved on the basis of the thickness employed.

INSOLE

ca. 90 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

ca. 10 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

LINING MATERIAL

A textile lining is pleasantly lightweight.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

The upper material technology gives increased protection from scree and sharp rocks on every trail.

Support is delivered through our unique asymmetrically shaped upper edge which precisely reflects the ankle's anatomy.

Anatomically shaped, molded heel counter guarantees stabilizing function throughout the entire run in all directions.

The LOWA® TRAC® sole system and the sticky rubber compound provides guaranteed traction, in wet or dry conditions.

DYNEVA

The triple density midsole features a cushioning DYNEVA interior that runs the length of the shoe.

UPPER MATERIAL

ca. 100 %

Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
