

ELLA GTX THE BIG KIDS AMONG SMALL WINTER SHOES.

The model ELLA GTX is both multifunctional and colourful. As a result, the lightweight multitailents are perfect for the very next adventure out in the snow. And they have no reason to be shy about the way that they look on the way there. Thanks to the stylish design, these fashionable winter shoes are something beautiful to see - in every type of weather.

1 Footwear equipped with a GORE-TEX membrane is reliably waterproof, windproof and breathable.

2 The LOWA PU outsoles set themselves apart with their reduced weight and very comfortable cushioning.

3 Lasts specially adapted to the anatomy of children's feet.

4 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

5 A special frame design known as LOWA MONOWRAP® provides stability.

COLOURS

Smokegreen/arctic
640553 7900

WEIGHT

540 g/Pair (UK 8)

SUITABLE FOR

School

School is the place where children and adolescents spend the day during the school week. School usually begins for children after they have turned 6. There are many types of schools. A number of subjects are taught in schools. The ELLA GTX is just right for school life.

Kindergarten

The ELLA GTX is the perfect shoe for kindergarten. Kindergarten is the place where children spend the day during the school week. These children are generally between the ages of 3 and 6. Children participate in the widest range of activities in their supervised group – indoors as well as outdoors in nature.

Playing

The ELLA GTX is the best playmate for the next adventure indoors or outdoors in nature.

SOLE

LOWA® AL-G

The stud design of the winter sole LOWA® AL-G will impress any child – it leaves behind great tracks in the snow and supports little adventurers in the snow. Two layers of PU provide optimal cushioning in the process.

MIDSOLE

ca. 100 %

Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result. Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 65 %

Polyethylene

Polyethylene is a semi-crystalline and non-polar thermoplastic resin that is, by far, the most widely used plastic in the world. Polyethylene is used in part as a component of man-made fibre/blended fabrics. It is used primarily to create comfort and insulate the foot from below.

ca. 35 %

Non-woven fabric

Non-woven fabric is a collection of fibre of limited length, filaments or cut yarns. Used as a component/covering of feet beds, the layer of non-woven fabric absorbs the heat generated by the foot, creating a pleasant feeling of comfort even in cold weather.

FUNCTIONS

A zipper that permits footwear to be put on or taken off more quickly.

The footwear has very soft rolling properties.

UPPER MATERIAL

ca. 60 %

Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 40 %

Suede leather

Suede leather comes from the flesh side of the hide. It has a looser fibre structure, a quality that creates a velvety surface and a light pile. Suede leather is particularly durable and open-pored. Depending on the desired look, suede leather can remain untreated or be oiled or waxed.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
